THE CLASSICAL FAKE BOOK

*The Encyclopedia of over 600
Classical Themes and Melodies*

An unprecedented, amazingly comprehensive reference for all classical music lovers. Imagine having one handy volume that includes everything from Renaissance music to Vivaldi to Mozart to Mendelssohn to Debussy to Stravinsky. An effort has been made to include as much of the world's most familiar classical music as possible, totalling over 600 titles. That means, for instance, a theme from every movement of every Brandenburg Concerto, or a theme from every movement of every Beethoven symphony. This encyclopedia is great to use for playing and performing. It's also a terrific reference for concert-goers, music students, or just plain music lovers. Think of how often we might think of a piece, but can't quite conjure it in our heads. With *The Classical Fake Book* you can find any tune readily (and be humming away in a matter of minutes). Lyrics, in the original language, are included when appropriate. All entries contain a fake book style presentation with melody line and harmony sketched in above it in chord labels.

THE BEST CHORD CHANGES

arranged by Champ Champagne

One of the most common ways to add interest and excitement to a song is through the use of “chord substitutions,” a process of altering original chords that creates harmony and more challenging arrangements. Champ Champagne removes any mystery associated with playing chord substitutions as he includes informative and easy-to-understand guidelines as well as helpful tips throughout this collection. Playing tips, introductions and endings appear in conjunction with many songs throughout the books. The music is presented in melody line/lyrics/chords format with chord substitutions printed above the original chords in red.
